What is the output of the following code? Recall that stacks and queues print in an `[a, b, c]` format from bottom/front to top/back.

```
Stack<String> s = new Stack<String>();
Queue<String> q = new LinkedList<String>();
s.push("how");
s.push("are");
s.push("you");
while (!s.isEmpty()) {
    q.add(s.pop());
}
System.out.println(q);
```

output [you, are, how]
